Subject: Application for R&D Internship – Sachin Balu Khaire | IIT Guwahati

Dear CTO (OrthoTech),

I am Sachin Balu Khaire, currently pursuing M.Tech in Biomedical Sciences and Engineering at the Indian Institute of Technology Guwahati. I am writing to apply for an internship opportunity in your Research & Development department.

I have a background in pharmaceutical sciences and biomedical engineering, and I am genuinely interested in the field of orthopedic implants and medical devices. Orthotech's long-standing focus on R&D and quality in joint replacement systems is something I deeply admire, and I would love to learn and contribute in your R&D team.

Through my academic projects, including the development of a wearable cardiac monitoring system and smart pressure monitoring system for prevention of pressure ulcers. These projects have equipped me with hands-on experience in prototype development, instrument characterization (AFM, SEM, TEM, XRD, HPLC, UV-Vis Spectroscopy), data analysis using Python — skills I believe are directly applicable to implant characterization and R&D workflows at Orthotech.

I am a quick learner, hardworking, and eager to gain hands-on industry experience. I am available to join at your convenience and am flexible with the internship duration.

Please find my resume attached. I would be grateful for the opportunity to be a part of your team.

Thank you for your time and consideration.

Sincerely,

Sachin Khaire
